

eCall Technical Workshop

15th October 2012

Chair: Nigel Wall

Chair of ITS UK Communications
Interest Group

Objectives

- To present an update on eCall, including technical standards; PSAP and network readiness; in-vehicle aspects; implementation options; system testing; adoption in other countries; and European regulatory aspects
- So that organisations represented here can determine how best they should respond to the opportunities (and challenges) created by eCall.
- Discussion of specific UK policy decisions is outside the scope of the workshop
